

Will the broadcast flag interfere with consumers ability to make copies of DTV content for their personal use, either on personal video recorders or removable media?

it absolutely will hinder legitimate copying for personal use

Would the broadcast flag requirement limit consumers ability to use their existing electronic equipment (equipment not built to look for the flag) or make it difficult to use older components with new equipment that is compliant with the broadcast flag standard?

it would make existing equipment useless before its time.

Would a broadcast flag requirement limit the development of future equipment providing consumers with new options?

it absolutely would inhibit development of new generation products.

What will be the cost impact, if any, that a broadcast flag requirement would have on consumer electronics equipment?

tremendously increase pricing. total lock / control of consumer

Other Comments:

the FCC should be pursuing what is best for the public and protecting the public. the current proposed rule will have a devastating effect on the public at large.
